

Local Sons Go International!

Denver- Rothberg, Tamburini & Winsor, Inc. (RTW) is excited to announce that it has joined Tetra Tech, Inc. and changed its name to Tetra Tech RTW. Capitalizing on the specialized talents of its nationally recognized engineers and consultants, locally headquartered RTW will be positioned to bring the unparalleled resources of an international company that is a Top 10 Design and Environmental firm and the No. 1 water engineering and design firm in the United States (*source: Engineering News-Record*).

“We are very proud of our successes over the last 25 years, and excited to join Tetra Tech. This merger will strengthen our ability to offer our clients a broad range of innovation solutions and provide our employees with enhanced opportunities for growth,” states Mike Rothberg, President, Tetra Tech RTW. “This is a fantastic opportunity to not only grow our business nationally, but bring broad design and engineering resources to our clients’ projects in the planning, design, and operations of their water and wastewater systems here in Colorado.”

Executive Vice President, Joe Tamburini, agrees: “RTW has grown from the small engineering firm that Mike and I started in 1984 to working on diverse projects domestically and internationally. We have a great team of scientists, engineers and consultants who will now have the opportunity to work on cutting-edge projects throughout the world, enabling us to apply our ‘lessons learned’ to benefit our current local clients.”

Tetra Tech RTW, located in downtown Denver, Fort Collins, and Colorado Springs, with additional field offices in Grand Lake, Clifton and Craig, has designed and led infrastructure projects for utilities, special districts, cities, counties, and the State of Colorado, based on a foundation of teamwork, project performance, and an understanding of the local water and wastewater issues. Project successes have included sustainable design, master-planning, public process, and conservation for Colorado’s growing communities, natural resources and historical-areas, with an eye toward the region’s unique challenges in providing healthy water resources. Joining the Tetra Tech family, Tetra Tech RTW will be able to offer greater resources for its clients, utilizing professional engineers and consultants in additional offices in Aurora, Boulder, Breckenridge, Grand Junction, Greenwood Village, Lakewood, Longmont, and Louisville.

About Tetra Tech (www.tetratech.com)
